ALLOVER

No-stress application and total coverage: three dimensional creativity.

ALLOVER is a single-component system exclusively for interior surfaces that creates **highly durable coatings on floors, ceilings and walls**. Allover creates cosy, harmonious environments by making modern, customised finishes in line with current interior-design trends. It enhances the existing design features, and optimises the areas by creating a pleasing aesthetic continuity in keeping with the norms of modern architecture. Recommended in residential, commercial and wellness premises.

Allover A706

FLOOR

Allover A718

Aesthetic beauty and ease of application.

The simplicity of application with only 4 to 5 steps makes it possible to obtain very resistant surfaces that are easy to clean, smooth and compact, depending on the desired degree of finish. The system also lends itself to further decoration with troweled effects.

The system can be applied directly to the most common surfaces (tiles, screeds, gypsum plasterboard and cement plaster) without costly and time-consuming preparation of substrates. It can be applied in areas such as living rooms, kitchens, bathrooms, laundry rooms, and even on furniture. It is perfect for protecting portions of the wall behind the stove and sink from water splashes and stains.

Allover A706

Creative seamless finishes.

ONLY 2 MM THICK

3 SINGLE-COMPONENT PRODUCTS

READY TO USE

EASY TROWEL APPLICATION

POSSIBILITY TO CUSTOMISE EFFECTS AND COLOURS

A few safe steps with 3 water-based products:

892

Allover Base

Decorative basecoat/finish coat

894

Allover Finish

Decorative finish coating

896

Allover Top

Water-repellent protective top coat

Benefits:

High Adhesion, excellent resistance: against impacts, to water, to stains, (coffee, wine, tea), to scratches, no demolition costs.

- Tested according to EN 2013:12720 for surface resistance to cold liquids
- Tested according to EN 12721:2013 for surface resistance to moist heat
- Suitable for environments with the presence of food as per UNI 11021:2002
- Suitable for underfloor heating
- Tested according to EN 425:2006 for abrasion resistance of office chair casters
- Reaction-to-fire classification: EN 13501-1:2019: B fl s1

Allover A718 / A702

ALLOVER

892 Allover Base

Decorative Basecoat/finish coating for seamless floor and wall-coverings. Allover Base is a trowelable paste product created specifically as a high adhesion base coat and at the same time a finish coat with a textured appearance, for application on both horizontal and vertical indoor surfaces. The product guarantees excellent adhesion to substrates such as concrete, old resin floors, and tiles. For smoother, less-porous finishes. Finish with 1 coat of ALLOVER Finish.

THECHNICAL DATA

TOOLS	stainless steel trowel
YIELD	0,6 – 0,8 kg/m ² per coat
LAYERS	1–2
DILUTION	ready to use

894 Allover Finish

Decorative finish coating for floors and walls. ALLOVER Finish can only be used over horizontal and vertical coatings prepared with ALLOVER Base, when a smoother, more minimalist and less textured aesthetic finish is desired.

THECHNICAL DATA

TOOLS	stainless steel spatula
YIELD	0,3–0,4 kg/m ² per coat
LAYERS	1–2
DILUTION	ready to use

896 Allover Top

Water-repellent protective, transparent top coat. Allover Top is the transparent water-dilutable protective coating for Allover System, with a semi-matte final effect. The product provides high resistance against water, hot and cold liquids, and many substances normally used in the residential and catering sectors.

THECHNICAL DATA

TOOLS	roller, brush, spray
YIELD	7–8 m ² /l in 2 coats
LAYERS	2
DILUTION	0–15% with water
